## **Assignment 2**

1. Create a user table with users with email, username, roll number, password.

```
CREATE TABLE USER (
rollno INTEGER PRIMARY KEY,
email TEXT NOT NULL,
name TEXT NOT NULL,
password TEXT NOT NULL
);

INSERT INTO USER VALUES (0001, 'hareesh@gmail.com','hareesh','123@45');
INSERT INTO USER VALUES (0002, 'alison@gmail.com', 'alison', '123@67');
INSERT INTO USER VALUES (0003, 'adri@gmail.com', 'adri', '123@89');
INSERT INTO USER VALUES (0004, 'adhi@gmail.com', 'adhi', '123@12');

SELECT * FROM USER;
```

2. Perform UPDATE, DELETE Queries with user table

```
CREATE TABLE USER (
rollno INTEGER PRIMARY KEY,
email TEXT NOT NULL,
name TEXT NOT NULL,
password TEXT NOT NULL
);

INSERT INTO USER VALUES (0001, 'hareesh@gmail.com', 'hareesh','123@45');
INSERT INTO USER VALUES (0002, 'alison@gmail.com', 'alison', '123@67');
INSERT INTO USER VALUES (0003, 'adri@gmail.com', 'adri', '123@89');
INSERT INTO USER VALUES (0004, 'adhi@gmail.com', 'adhi', '123@12');

UPDATE USER
SET name='john', email='john@gmail.com'
WHERE rollno='0001';

DELETE FROM USER WHERE rollno='0002';

SELECT * FROM USER;
```

3. Connect python code to db2.

```
from ibm_db import connect
# Careful with the punctuation here - we have 3 arguments.
# The first is a big string with semicolons in it.
```

4. Create a flask app with registration page, login page and welcome page. By default load the registration page once the user enters all the fields, store the data in the database and navigate to the login page to authenticate user username and password. If the user is valid show the welcome page

```
# Store this code in app.py file
from flask import Flask, render template, request, redirect, url for, session
from flask mysqldb import MySQL
import MySQLdb.cursors
import re
app = Flask( name )
app.secret_key ='your secret key'
app.config['MYSQL HOST'] ='localhost'
app.config['MYSQL USER'] ='root'
app.config['MYSQL PASSWORD'] = 'your password'
app.config['MYSQL DB'] = 'geeklogin'
mysql = MySQL(app)
@app.route('/')
@app.route('/login', methods =['GET', 'POST'])
def login():
  msg ="
  if request.method =='POST'and'username'in request.form and'password'in
request.form:
    username = request.form['username']
    password = request.form['password']
    cursor = mysql.connection.cursor(MySQLdb.cursors.DictCursor)
    cursor.execute('SELECT * FROM accounts WHERE username = % s AND
password = % s', (username, password,))
```

```
account = cursor.fetchone()
    if account:
      session['loggedin'] = True
      session['id'] = account['id']
      session['username'] = account['username']
      msg ='Logged in successfully !'
      return render_template('index.html', msg = msg)
    else:
      msg ='Incorrect username / password !'
  return render_template('login.html', msg = msg)
@app.route('/logout')
def logout():
  session.pop('loggedin', None)
  session.pop('id', None)
  session.pop('username', None)
  return redirect(url for('login'))
@app.route('/register', methods =['GET', 'POST'])
def register():
  msg ="
  if request.method =='POST'and'username'in request.form and'password'in
request.form and email in request.form:
    username = request.form['username']
    password = request.form['password']
    email = request.form['email']
    cursor = mysql.connection.cursor(MySQLdb.cursors.DictCursor)
    cursor.execute('SELECT * FROM accounts WHERE username = % s',
(username,))
    account = cursor.fetchone()
    if account:
      msg ='Account already exists!'
    elif not re.match(r'[^@]+@[^@]+\.[^@]+', email):
      msg ='Invalid email address!'
    elif not re.match(r'[A-Za-z0-9]+', username):
      msg ='Username must contain only characters and numbers!'
    elif not username or not password or not email:
      msg ='Please fill out the form!'
    else:
      cursor.execute('INSERT INTO accounts VALUES (NULL, % s, % s, % s)',
(username, password, email,))
      mysql.connection.commit()
      msg ='You have successfully registered!'
  elif request.method =='POST':
    msg ='Please fill out the form!'
  return render template('register.html', msg = msg)
```
